

### Solving and Diagonalization information

+ Full Geometry - Cosmics in the Pit (Nominal)  
 AlignProcessLevel: 1  
 AlignSolveLevel: 3  
 HitCut: 150  
 Number of aligned parameters: 6  
 Number of aligned modules: 4  
 - Pixel aligned modules: 1  
 - SCT aligned modules: 3  
 Number of DoFs: 24  
 ModCut: 6  
 SoftModeCut applied

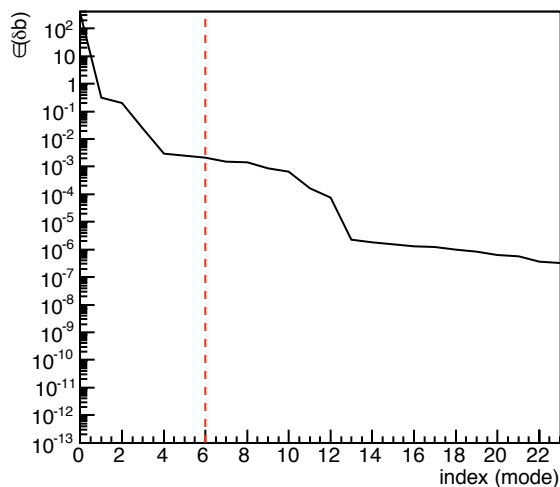

Eigenvalue spectrum

$\delta b$  Vs index (eigenmode Vs mode)

$\epsilon(\delta b)$  spectrum

$\delta b / \epsilon(\delta b)$  Vs index (Pull spectrum)

$\delta b / \epsilon(\delta b)$  (eigenmode pulls)

Local Pixel align correction -  $\Delta Tx$  Vs Hits per Module

Local Pixel align correction -  $\Delta Ty$  Vs Hits per Module

Local Pixel align correction -  $\Delta Tz$  Vs Hits per Module

Local Pixel align correction -  $\Delta Rx$  Vs Hits per Module

Local Pixel align correction -  $\Delta Ry$  Vs Hits per Module

Local Pixel align correction -  $\Delta Rz$  Vs Hits per Module

Local Pixel align correction error -  $\sigma(\Delta Tx)$  Vs Hits per Module

Local Pixel align correction error -  $\sigma(\Delta Ty)$  Vs Hits per Module

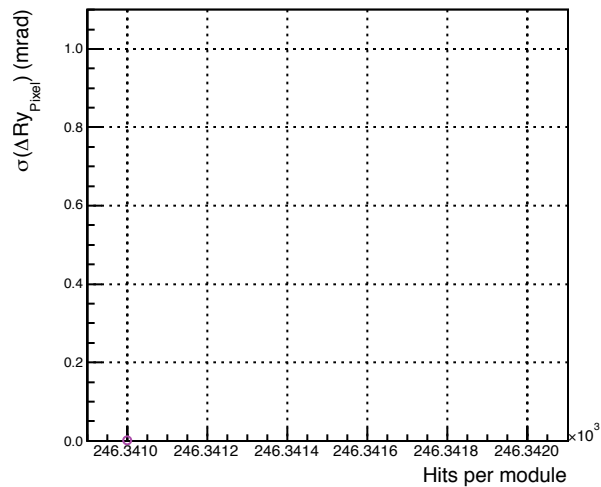

Local Pixel align correction error -  $\sigma(\Delta Tz)$  Vs Hits per Module

Local Pixel align correction error -  $\sigma(\Delta Rx)$  Vs Hits per Module

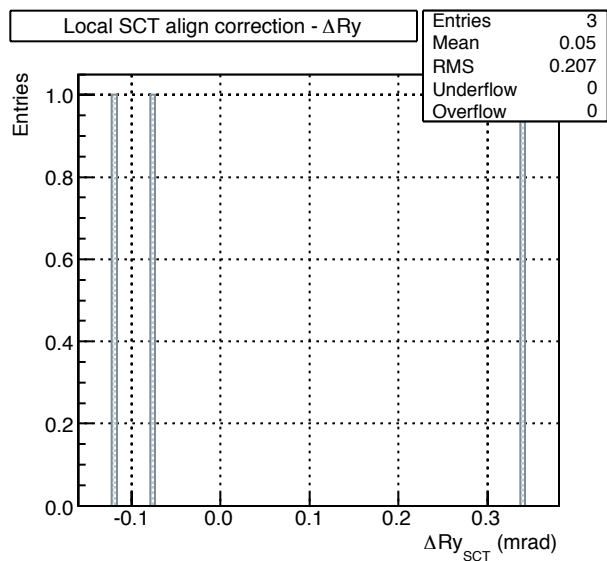

Local Pixel align correction error -  $\sigma(\Delta Ry)$  Vs Hits per Module

Local Pixel align correction error -  $\sigma(\Delta Rz)$  Vs Hits per Module

Local SCT align correction -  $\Delta T_x$  Vs Hits per Module

Local SCT align correction -  $\Delta T_y$  Vs Hits per Module

Local SCT align correction -  $\Delta T_z$  Vs Hits per Module

Local SCT align correction -  $\Delta R_x$  Vs Hits per Module

Local SCT align correction -  $\Delta R_y$  Vs Hits per Module

Local SCT align correction -  $\Delta R_z$  Vs Hits per Module

Local SCT align correction error -  $\sigma(\Delta Tx)$  Vs Hits per Module

Local SCT align correction error -  $\sigma(\Delta Ty)$  Vs Hits per Module

Local SCT align correction error -  $\sigma(\Delta Tz)$  Vs Hits per Module

Local SCT align correction error -  $\sigma(\Delta Rx)$  Vs Hits per Module

Local SCT align correction error -  $\sigma(\Delta Ry)$  Vs Hits per Module

Local SCT align correction error -  $\sigma(\Delta Rz)$  Vs Hits per Module
